

Control-Cric[®]

Surgical Cricothyrotomy Kit

The Control-Cric is packaged in 3 clear steps, guiding the provider through an otherwise chaotic procedure. Step 1 is the Cric-Knife™, a 10mm dual-sided blade with an integrated sliding tracheal hook. This allows the provider to maintain control of the airway instead of reaching for additional tools and potentially losing the airway. Step 2 is the Cric-Key™, a 5.5mm cuffed tube with an integrated introducer. The introducer gives tactile feedback of the tracheal rings, confirming placement. Step 3 is the neck strap, a flexible silicone strap to slide easily over the tube to maintain position during ventilation.

Compact 3-Step packaging

Rapid deployment to oxygenate/ventilate

BVM Wedge included

Cric-Knife™

- 10mm dual-sided blade
- Integrated sliding tracheal hook
- Designed to grip like a pencil
